

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental corporation which consists of Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

Their United States partner, Doosan Infracore America Corporation, located in Suwanee, Georgia houses a 170,000 square foot production facility, home to a Compact Equipment and Construction division. Cleveland, Peoria houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool department. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer wishes.

With a system consisting of over 90 autonomous dealers, the forklift group provides quality materials handling equipment to the broad North American marketplace. Doosan Infracore America Forklift dealers successfully operate in over 220 service and product sales places throughout Canada and the U.S. The forklift product line impressively features 63 distinctive versions consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous vehicle models range from 3,000 to 33,000 lbs. All trucks are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift and lift truck corporation in the North American market, due to its excellent level of product performance and their consistently high level of client support and service given to all Doosan Infracore Forklift users. The U.S. forklift division located in Cleveland has a expert team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Initially the home-based forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled forklifts as part of a home-based machinery expansion venture. Sales of these products were initially targeted to state-run firms, large scale organizations, and the military. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical training became the new focus for improving quality and product development.

Daewoo began the first home-based forklift business in 1967, and quickly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a position of substantial expansion of their forklift business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to respond to competitive pressures in the US materials handling market. This venture greatly expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a contemporary plant which helped set up the company for the manufacture of high end added-value goods suitable for export. In 1993, the corporation had a international sales system and started exporting versions they had developed through in-house technology, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas markets.
